Jellyfinity Privacy Policy

Last Updated: [10/15/2026]

Jellyfinity respects your privacy. This app is designed for self-hosted Jellyfin users and does not collect, store, or transmit any personal data. All media access happens directly between your device and your Jellyfin server.

1. Information We Do Not Collect

Jellyfinity does **not** collect, store, or share any of the following:

- Personal information
- Account details
- Email addresses
- Device identifiers
- Usage analytics
- Location data
- Advertising data
- Tracking information

Jellyfinity does not use third-party analytics, advertising frameworks, or external SDKs.

2. Local App Data

Jellyfinity stores only the data required for the app to function, including:

- Your Jellyfin server URL
- Your Jellyfin login token
- Offline media downloads
- Playback preferences
- **Optional TMDB API key provided by you**

All of this information is stored **locally on your device** and is never transmitted to any third-party service by Jellyfinity.

You may delete this data at any time by removing the app or clearing downloads and settings within the app.

3. TMDB Integration

Jellyfinity supports TMDB metadata **only when you supply your own TMDB API key**.

Important details:

- Jellyfinity does **not** provide a TMDB API key
- Jellyfinity does **not** send any data to TMDB on your behalf
- Any TMDB requests are made **directly from your device** using the key you supply
- Jellyfinity does **not** store or transmit your TMDB key outside your device

You remain fully responsible for your use of the TMDB API and for complying with TMDB's terms of service.

4. Connection to Your Jellyfin Server

Jellyfinity communicates **directly** with your self-hosted Jellyfin server. All media, metadata, and account information comes from your server and remains under your control.

Jellyfinity does not proxy, reroute, or store your server data.

5. Third-Party Services

Aside from optional TMDB requests initiated by your device using your own API key, Jellyfinity does not integrate with or send data to any third-party services.

6. Children's Privacy

Jellyfinity does not collect personal data from anyone, including children under 13. Parental controls and content restrictions are managed entirely through your Jellyfin server.

7. Security

All communication between Jellyfinity and your Jellyfin server uses the security settings you configure on your server (including HTTPS if enabled). Jellyfinity does not alter or bypass your server's security configuration.

8. Your Control

Because Jellyfinity does not collect data, there is nothing to request, export, or delete beyond what is stored locally on your device. You maintain full control of all data through your Jellyfin server and your TMDB API key.

9. Changes to This Policy

If Jellyfinity's functionality changes in a way that affects privacy, this policy will be updated. The latest version will always be available in the app and on the official website.

10. Contact

If you have questions about this privacy policy, you can reach the developer at:
